- Azure

Support

## Assistance

- Break-Fix Block Hours
- On-Going Assurance

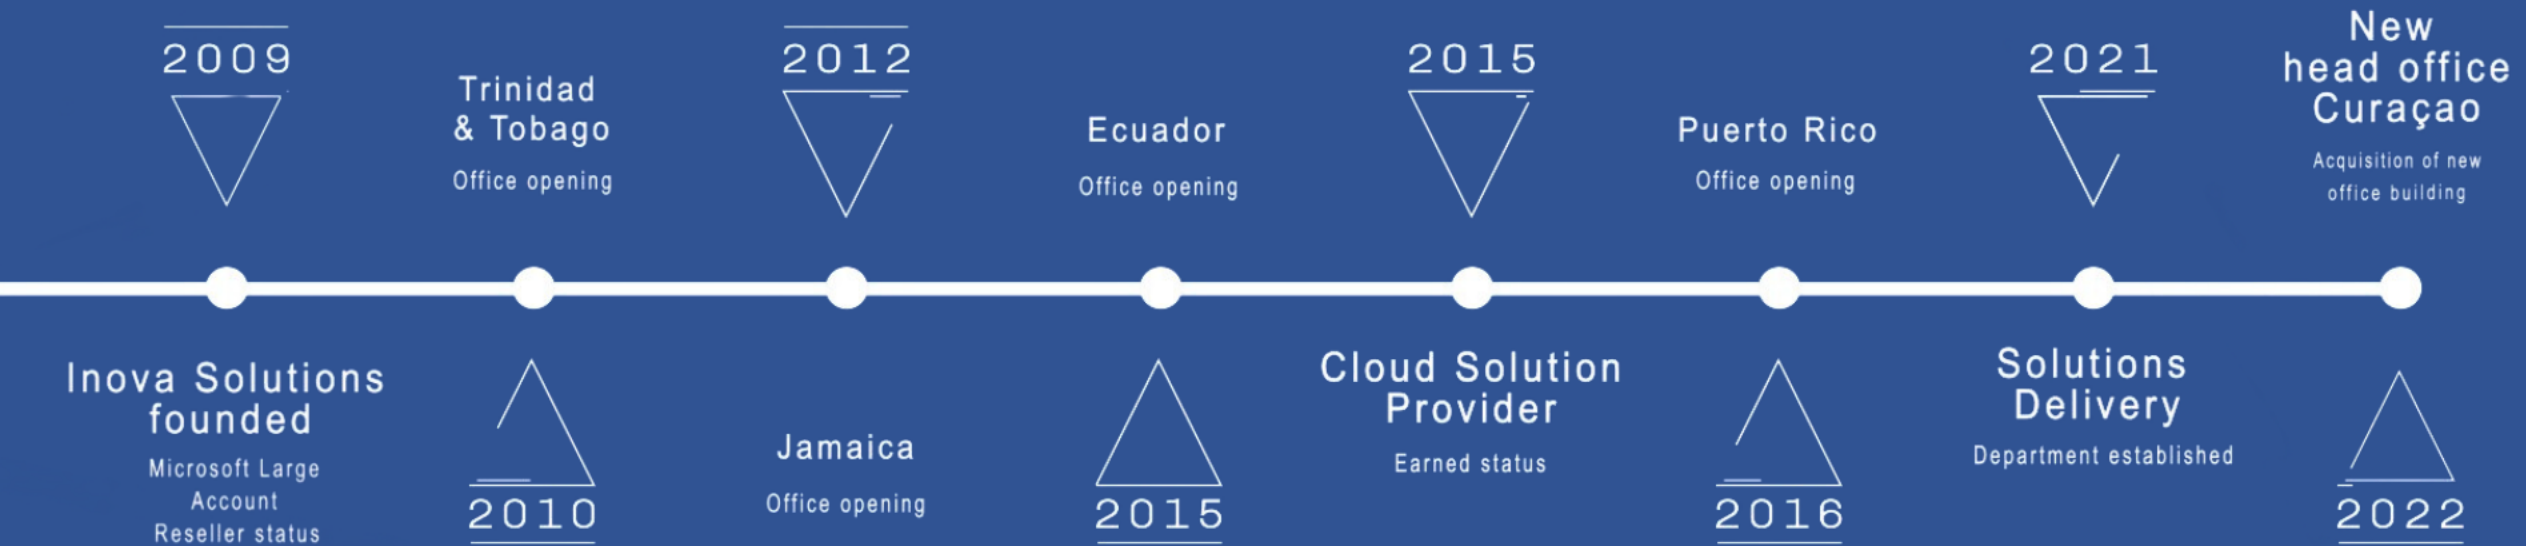

Usage  
Optimization

## Increase Value

- Microsoft 365 Usage
- Software Assets Mgmt.
- Licensing Assessment
- Azure and Cloud

# Our history

# Our Core Values

**LOCAL**

**EXPERTISE**

**DEDICATION**

**FLEXIBILITY**

## 5 Blockers to Moving to the Cloud and Overcoming Them

## 5 Blockers to Moving to the Cloud and Overcoming Them

### 1. We don't have a clear data strategy:

- What data do you actually use, what data has value, and what data is needed to answer key questions emerging from your organizations' strategy

### 2. We don't have C-Level buy-in:

- Key stakeholders at C-Level and Board understand drivers like productivity and collaboration, or to save costs of legacy platforms.

### 3. It's going to cost too much money:

- improved productivity- that's things like the workforce being able to collaborative, less duplication, and more trust and confidence in the data.

### 4. We don't want to put our information in the cloud:

- biggest Cloud providers, they invest so much money, time, resources and specialist skills, and they are focused on delivering the highest level of security

### 5. Users are resistant to change:

- engage employees, seek out champions, and equally, motivate people to become champions.

# Power Breakfast Series - Agenda

-  8:00 am **Arrival, Breakfast & Networking**
-  8:45 am **Welcome and Opening Remarks**
